

PROFESSIONAL
TEMPORARY SOCCER PITCH
SERVICE

GHG UST Natural Sports Turf System™

Here at Greenhorizons Sod Farms, we do some pretty incredible things... From growing Premium Kentucky bluegrass on over 5000 acres across Ontario, to reviving weedy local playing fields so that they have nearly 100% turf coverage. But that's just the beginning. We have become Canada's leader in temporary natural sports turf installations and management. Our attention to detail is unprecedented, ensuring that the players and fans experience a traditional match utilizing a non-traditional process.

We have a comprehensive team of trained personnel and a massive arsenal of specialized turf equipment. All our logistics operations are managed with precision and professionalism. When time is of the essence, we are prepared to spring into action and complete projects at a speed unattainable by our competitors.

We have plenty of experience working with some of Canada's Premier Sports Venues such as the Rogers Centre and BMO Field. Both venues had strict field

specifications that were to be met within tight timelines. Over 40 years of experience handling turf ensured that we could easily complete these projects.

So if you need a temporary natural turf pitch that will perform at a professional level, there's really only one choice: Greenhorizons' GHG UST Natural Sports Turf System™.

WAITING FOR YOUR CALL!

Give us a call and we can discuss the requirements of your job. We're in the business of making people happy and we pride ourselves in reacting quickly to our customers needs.
