

# STEP BY STEP GUIDE TO TOP DRESSING

1

Mow your lawn short.

2

Remove the lawn clippings and any other debris.

3

Distribute the Topdress Mix evenly in rows around your lawn. Using the back of a rake (don't want to rip into the surface) push and pull the Topdress.

4

Using a broom or garden rake, brush the soil so it moves through the blades of grass.

5

You want to make sure you allow the grass to poke through the Topdressing Mix. You do not want to smother it.

6

Water lightly 3 X's daily for seven to ten days or until seed is germinated.

## OPTIONAL:

**Overseed** - to give your lawn thicker growth, better colour, control thatch and weeds.

**Fertilizer** - to feed soil. Replace nutrients lost through winter damage, traffic, erosion
