

# GREENHORIZONS PRODUCT DATA SHEET

## PURE FINE FESCUE

Greenhorizons Pure Fine Fescue is an exclusive, low-maintenance blend of Creeping Red, Hard and Chewings Fescues which are heat, drought and shade tolerant. This blend is a fine-textured turf with low fertility requirements and is enhanced with endophytes to resist insect pests. Our Pure Fine Fescue is specifically blended for specialty applications including sloped, out-of-play areas on golf courses and back faces of fairway bunkers. The varieties in this blend are best suited to low traffic, low maintenance areas and can be left to grow long for a 'links-style' appearance.

### IDEAL APPLICATIONS

- Low maintenance golf course out-of-play areas
- Golf bunker complexes
- No mow - minimum mow applications
- Add dimension to any landscape
- Moderately shaded areas

### DETAILS

At Greenhorizons, our GHG ECO SOLUTIONS: Pure Fine Fescue is maintained at 2" on sandy loam soil at a facility in Southwestern Ontario that is central to our customer base to ensure timely shipping of product. Whether you require our GHG ECO SOLUTIONS: Pure Fine Fescue for small repairs or your entire project, count on us to deliver outstanding quality sod every time!
